Trending Assistance for ACAMA Statement of Work

Changing parcels from one existing neighborhood to another existing neighborhood.

- Step 1: Provide to townships an Excel spreadsheet with parcel number, existing neighborhood code, and any other (as requested) parcel-file based field to customer. This will include a blank column for existing neighborhood codes where township is to populate neighborhood changes and return file to us.
- Step 2: Apply the updated neighborhood code to the associated parcels based on the spreadsheet in a mass process.

Changing Parcels from an Existing Neighborhood to a New Neighborhood

- Step 1: Provide to townships an Excel spreadsheet with parcel number, existing neighborhood code, and any other (as requested) parcel-file based field to customer. This will include a blank column for new neighborhood codes where township is to populate and return file to us.
- Step 2: Apply the updated neighborhood code to the associated parcels based on the spreadsheet in a mass process.

Creation of New Neighborhoods Table Entries and Land Unit Rate Table Entries

- Step 1: Create Neighborhood Table entries based on information provided by townships.
- Step 2: Create Land Unit Rate Table entries based on information provided by townships.

Update of Neighborhood Factors

- Step 1: Apply factors provided by townships to Neighborhood Codes where existing neighborhood factor is changing.

Batch Costing

After all neighborhood changes are applied, begin Batch Costing process. This includes processes related to the pricing of land and improvements. Provide reports to townships generated by batch pricing processes for clean up. These reports must be addressed by townships before posting of values can take place.
